

## The Skylark Federation

### Prevent Risk Assessment November 2022

Under the Prevent Duty, schools are expected to assess the risk of children being drawn into terrorism, including support for extremist ideas that are part of terrorist ideology. This means being able to demonstrate both a general understanding of the risks affecting children and young people in the area and a specific understanding of how to identify individual children who may be at risk of radicalisation and what to do to support them.

In the Skylark Federation, we already mitigate the risks by raising awareness of staff through Prevent training and using internet filters on school ICT systems. This risk assessment is a way of evidencing how our schools are reducing the risks of children as well as staff being exposed to messages and influences of violent extremism and radicalization.

This risk assessment will:

- Identify the threats in relation to the summary of local risk
- Decide who might be harmed and how
- Evaluate the risks and decide on precautions
- Record any significant findings

Sussex Police produce an annual profile of risks relating to counter terrorism in East Sussex. This profile also records levels of referrals in relation to young people and details of the type of ideology to which they appear to be vulnerable and susceptible. This information has been incorporated into this risk assessment.
